TRAVEL AND EXPENSES

Claim submission and approval

This standard covers approved business expenses paid personally by employees. It does not authorize travel or spending that has not received the required advance approval.

01 / Submission deadline

Submit expense claims within 15 calendar days of purchase. Count the day after purchase as day 1. Upload an itemized receipt, payment evidence, business purpose, project code and manager's advance approval. For example, a purchase on 10 October must be submitted by 25 October. A card statement alone does not replace an itemized receipt.

02 / Approval and payment

The line manager checks the business purpose within 2 business days of a complete submission. Finance aims to pay an approved, complete claim within 5 business days after receiving manager approval. Missing receipts pause that target until the employee supplies the information. The target is not a guaranteed bank settlement time.

03 / Late claims

A late claim needs a written explanation and Finance Operations approval before reimbursement. The employee must not alter a purchase date to make a claim appear timely. Claims with missing receipts or disputed categories remain open for review; late submission does not automatically authorize payment.

Approved by the Finance Director on 15 December 2025. Monetary limits below are fictional company controls, not tax guidance.

TRAVEL AND EXPENSES

Spending limits and evidence

All limits are in INR and include tax unless an approved trip budget states otherwise. Split receipts from the same purchase must be considered together.

04 / Travel authorization

Obtain manager approval for the trip and its budget before booking. Domestic hotels are capped at INR 4500 per night and meals at INR 900 per travel day. Alcohol, personal entertainment and companion costs are not reimbursable. Any over-limit booking requires written Finance approval before payment; a client meeting alone does not waive the cap.

05 / Equipment and local transport

The annual equipment allowance is INR 5000 per employee, including tax, as described in AV-HR-002. Local taxi claims require a receipt and the origin, destination and business purpose. This policy does not set a universal taxi-price cap; the manager checks reasonableness against the approved trip budget.

06 / Duplicates and refunds

Do not claim an expense already paid by a company card or reimbursed by a client. Notify Finance within 2 business days of receiving a refund for a reimbursed item. Finance records the adjustment against the original claim reference so the audit trail remains intact.

Category	Limit	Required evidence
Domestic hotel	INR 4500 per night	Itemized hotel invoice
Travel meals	INR 900 per day	Itemized receipt
Home-office equipment	INR 5000 per year	Approval and receipt
Local taxi	Approved trip budget	Receipt and journey purpose

TRAVEL AND EXPENSES

Worked example and controls

Use this example to check the difference between a spending allowance, a claim deadline and a payment service target.

07 / Example: equipment receipt

An approved headset costs INR 3500 before tax. Tax is INR 630, giving a total claim of INR 4130. The annual equipment allowance is INR 5000, so the remaining balance is INR 870 if there were no earlier equipment claims. Submit the claim within 15 calendar days; the unused balance is not payable in cash.

08 / Resolving a returned claim

Finance returns an incomplete claim with the missing items listed in the expense portal. The employee should reply against the same claim reference rather than submit a duplicate. The 5-business-day processing target begins after the complete claim and manager approval are received. Escalate an unresolved claim to Finance Operations with its reference and submission date.

09 / Handling sensitive receipts

Mask unrelated personal payment details before adding a receipt to a project workspace. Preserve the merchant, date, items, tax and total needed for review. Financial records belong in the approved expense system; the information security classification controls in AV-SEC-001 still apply.

Useful cross-check: the fictional demo receipt DEMO-1042 shows the same INR 4130 equipment example. It is not a real transaction.
